Math Concepts: Two-digit numbers on a number line

Materials: Paper and pencil

Players: 2

Set up: Have a paper with a shared number line from 0 to 100. It only needs to have the 10's marked on the number line.

Play: On a turn, a player uses two random numbered cards from 0 to 9. The player chooses the order of these two digits to generate a number from 00 to 99, and then puts that number on their side of the number line.

Goal: The first player to get four numbers in a region without any of the opponent's numbers in between theirs wins.

– DISCUSSION AND TIPS –

Discuss situations when there is a choice of blocking the opponent or putting more numbers together in a region.

– VARIATIONS –

The game can also be played with 3-digit numbers going from 000 to 1000.
